Research

We were delighted to have had the opportunity to present two [posters](#) at The European Stroke Conference (ESOC 2023).

- Have outcomes for intracerebral haemorrhage in the UK improved? 10-year data from the nationwide stroke registry
- Real-world evidence of the efficacy of mechanical thrombectomy in the UK: results from nationwide stroke registry and comparison with the HERMES meta-analysis

Key resources

There are two ways records can be transferred for 6 month assessment, [click here](#) to find out more.

- Go to Clinical > 6 month assessment > Enter and transfer records and select "Search for patient ready for six month assessment".
- Select the team performing the 6 month review in the first dropdown box.
- Select the last team to treat the patient in the second dropdown box.
- You will then need to enter either the SSNAP ID and NHS number, or the SSNAP ID OR NHS Number and one of a, b or c below to search.

a. Date of arrival at first hospital: AND Time of arrival at first hospital:
b. Date of arrival at first hospital: AND Date of onset:
c. Two of the the following:
i. Last name:
ii. Date of birth:
iii. Post code:

Stroke Association

PREMS fieldwork officially closed on 18 April 2023 with a **response rate of 37%**. This equates to **6,616 stroke survivors having responded to the survey** via post or online to share their experience of stroke care with us.

This excellent response rate for a first-time stroke survey has been welcomed as a demonstration of the stroke survivor's desire to share their experiences.

Thank you to all those in the stroke community who have engaged with the project team to achieve this fantastic result!

PREMS reports scheduled for September 2023:

- National Report.
- National Report – Aphasia version.
- Local Acute Trust Pathway Report.
- Local Systems Pathway Report.
