Clinical Dataset Changes

Section 2: Casemix - First 24hs

Co-morbidities - Dementia

New answer option for Q2.1

2.1.   Did the patient have any of the following co-morbidities prior to this admission?

2.1.1	Congestive Heart Failure:	Yes ○	No ○
2.1.2	Hypertension:	Yes ○	No ○
2.1.3	Atrial fibrillation:	Yes ○	No ○
2.1.4	Diabetes:	Yes ○	No ○
2.1.5	Stroke/TIA:	Yes ○	No ○
2.1.6	Dementia:	Yes ○	No ○

Clinical Dataset Changes

Section 2: Casemix - First 24hs

First brain imaging after stroke

Two new questions

2.4 Date and time of first brain imaging after stroke   *HH:MM DD/MM/YYYY*   or   Not imaged ○

2.4.1. Modality of first brain imaging after stroke:

- Plain/non-contrast CT ○
- CT Intracranial angiogram ○
- CT Perfusion ○
- Plain/non-contrast MRI ○
- Contrast-enhanced MRA ○
- MR Perfusion ○

2.4.2 Was artificial intelligence (AI) used to support the interpretation of the first brain imaging?   Yes ○   No ○

Clinical Dataset Changes

Section 2: Casemix - First 24hs

Additional thrombectomy questions

A new thrombectomy dataset will be introduced in Section 2 – **the complete dataset will be shared with thrombectomy centres**

New format for recording thrombectomy referrals

Current format

2.11 Did the patient receive an intra-arterial intervention for acute stroke?   Yes ○   No   ○
To be answered by the thrombectomy-performing centre

Clinical Dataset Changes

Section 2: Casemix - First 24hs

Additional thrombectomy questions

New format

Was patient referred for intra-arterial intervention for acute stroke? *(answered by first admitting team)*

Yes, accepted at this team	◯
Yes, accepted at another team	◯
Yes, but declined	◯
Not referred	◯

Questions to be answered by first admitting team for transferred patients <u>only</u>

Date and time of initial referral for intra-arterial intervention   `HH:MM DD/MM/YYYY`

Date and time ambulance transfer requested   `HH:MM DD/MM/YYYY`

Date and time ambulance departed referring hospital   `HH:MM DD/MM/YYYY`

Was a helicopter used?   Yes ◯   No ◯

To be answered by thrombectomy-performing centre

Did the patient receive an intra-arterial intervention for acute stroke?   Yes ◯   No ◯

Clinical Dataset Changes

Section 3: Assessments – First 72hs

Consent at 72 hours – new question

It is <u>not</u> a requirement that the patient provides explicit consent for their patient identifiable details to be included in SSNAP at this stage.

However, where efforts have been made to seek consent from the patient, please state if the patient gave consent for their identifiable information to be included in SSNAP?

Yes, patient gave consent	O
No, patient refused consent	O
Patient was not asked	O

It is <u>not</u> mandatory to ask for consent before six months, but the question must be answered on SSNAP. If the patient cannot consent or has not been asked, please record "Patient was not asked".

Clinical Dataset Changes

Section 4: Acute and Community Therapy

For ALL teams – new question on rehabilitation minutes

	1. Physiotherapy	2. Occupational Therapy	3. Speech and Language Therapy	4. Psychology
4.4. Was the patient considered to require this therapy at any point in this admission?				
4.4.1 If yes, at what date was the patient no longer considered to require this therapy?				
4.5 On how many days did the patient receive this therapy across their total stay in this hospital/team?				
4.6. How many minutes of this therapy in total did the patient receive during their stay in this hospital/team?				
4.6.1. How many of the total therapy minutes were provided by a rehabilitation assistant?				

Clinical Dataset Changes

Section 4: Acute and Community Therapy

For non-inpatient teams ONLY – new question on teletherapy minutes

	1. Physiotherapy	2. Occupational Therapy	3. Speech and Language Therapy	4. Psychology
4.4. Was the patient considered to require this therapy at any point in this admission?				
4.4.1 If yes, at what date was the patient no longer considered to require this therapy?				
4.5 On how many days did the patient receive this therapy across their total stay in this hospital/team?				
4.6. How many minutes of this therapy in total did the patient receive during their stay in this hospital/team?				
4.6.1. How many of the total therapy minutes were provided by a rehabilitation assistant?				
4.6.2 How many of the total therapy minutes were delivered by video/teletherapy?				

Clinical Dataset Changes

Section 4: Acute and Community Therapy

For non-inpatient teams ONLY

New questions on nursing care

Was the patient considered to require nursing care any point in this admission?
If yes, at what date was the patient no longer considered to require this care?
On how many days did the patient receive nursing care across their total stay in this team?
How many minutes of nursing care in total did the patient receive during their stay in this team?

New questions on mood and cognition screening

Date patient screened for mood using a validated tool HH:MM DD/MM/YYYY or Not screened ◯
      If not screened, what was the reason?

Date patient screened for cognition using a simple standardized measure? HH:MM DD/MM/YYYY or Not Screened ◯
      If not screened, what was the reason?

Clinical Dataset Changes

Section 7: Discharge/Transfer

Consent at discharge

It is <u>not</u> a requirement that the patient provides explicit consent for their patient identifiable details to be included in SSNAP at this stage.

However, where efforts have been made to seek consent from the patient, please state if the patient gave consent for their identifiable information to be included in SSNAP?

        Yes, patient gave consent   ○
        No, patient refused consent ○
        Patient was not asked   ○

It is <u>not</u> mandatory to ask for consent before six months, but the question must be answered on SSNAP. If the patient cannot consent or has not been asked, please record "Patient was not asked".

Clinical Dataset Changes

Section 7: Discharge/Transfer

COVID-19

Was COVID confirmed* at any time during the patient's stay at this team or after death?

Yes   O

No   O

Not Known   O

If yes, was COVID:

Present on admission (i.e. the admission COVID test was positive)   O

Confirmed subsequently during the patient's stay at this team   O

*Confirmed: a positive test (of any kind) OR a negative test but diagnosed with COVID clinically and treated as such

Clinical Dataset Changes

Section 8: Six month assessment tool

New questions on returning to work

Employment status prior to stroke

Working full-time	○	Working part-time	○
Retired	○	Studying or training	○
Unemployed	○	Other	○

Employment status currently

Working full-time	○	Working part-time	○
Retired	○	Studying or training	○
Unemployed	○	Other	○

EQ-5D-5L (https://euroqol.org/support/how-to-obtain-eq-5d/) PAPER QUESTIONNAIRE

Clinical Dataset Changes

Section 8: Six month assessment tool

EQ-5D-5L (https://euroqol.org/support/how-to-obtain-eq-5d/) QUESTIONNAIRE ON THE SSNAP WEBTOOL

Under each heading tick the option that describes your health TODAY | *1-5*
Mobility | *1-5*
Self-care | *1-5*
Usual activities (e.g. work, study, housework, family or leisure activities) | *1-5*
Pain / Discomfort | *1-5*
Anxiety / Depression

How is your health today? | *1-100*

Webtool change

Flag for consent

If consent has been recorded in Section 3 or Section 7 by this team or a prior team, this will be flagged to all future teams.

Post-acute providers can start records

Post-acute providers will be able to start records and record data for patients that have not been added by acute teams.

Reporting Changes

Report 30 (October-December 2020)

- ISDN reports
- Ethnicity (national and ISDN level only)
- Compliance against 7-day therapy targets in-hospital

Report 31 (January-March 2021)

- IMD deciles (national and ISDN level only)
- Additional pre-hospital measures (ambulance trust and ISDN level)

Reporting Changes

Report 33 (July-September 2021)

- Reporting additions to clinical dataset
- Caseload and relevant care measures on patients arising in community

Future reports

- Days at home (first 4m from admission)
- COVID status imported (HES)

Recap

- **Consent**

  It is <u>not</u> mandatory to ask for consent before six months. If you do, the answer can be recorded within 72 hours or at discharge. Please note that this consent covers patient identifiable information – if a patient refuses consent, you would still enter all of their processes of care information (deleting all the the identifiable info) into the webtool.

- **Post-acute providers can start records**

  This facility is only for those patients whose records are NOT on SSNAP. Please do not begin records at post-acute level if the acute team for those records is part of SSNAP.

- **Therapy minutes by Rehabilitation Assistant**

  This indicator will apply for each of the 4 types of therapy.

- **Dates**

  SSNAP expects to introduce these changes in late June.

Thank you for attending 'Reporting and Clinical dataset changes'

If you would like to send us any comments remember you can do it by email to ssnap@kcl.ac.uk
